x Woods _____ thin _____ thick
_____ Marsh _____ Water
_____ Flat _____ Hilly

Evidence Found:

- (1) Indication 1 Location: 18 T 04 07 566 48 09 355 Time: 1:47pm
(2) Indication 2 Location: 18 T 04 07 569 48 09 353 Time: 1:50pm
(3) Indication 3 Location: 18 T 04 07 570 48 09 357 Time: 1:52pm

All coordinates are in UTM. The Datum is WGS84.

Individuals Present: Lisa Peebles, Randi Bianco, Kathryn Bamford

Narrative: At the above listed date and time I met with Lisa Peebles and Randi Bianco to conduct a search with my cadaver dog K9 Libby. The area was at a location set in open hardwoods south of Rice Road in Mexico, NY. The search location consisted of a shallow depression where soil had been removed. Around the depression was an assortment of junk and debris. To the west of the depression was a small stream.

The search started with Kathryn Bamford and her cadaver dog K9 Hawk searching the site. K9 Libby and I staged at a location out-of-sight of the first search of the site.

At 1:44pm I received a radio transmission that K9 Hawk had completed the search of the site and that I could proceed to enter the area and begin my search with K9 Libby. At 1:46pm I gave K9 Libby her search command and she began to work from the south side of the site. K9 Libby worked from South to North. When she entered the shallow depression she performed her trained indication (consisting of a "down") noted above as Indication 1. K9 Libby also performed 2 more trained indications noted above by Indication 2 and Indication 3. These 2 indications were also located in the shallow depression. At 1:58pm I finished my search of the site and removed K9 Libby from the search area.
